

TRU-COLOR™ EPDM Granules

NEW AND IMPROVED

Ultimate RB has been manufacturing EPDM rubber for use in running tracks, playgrounds, flooring, and a myriad of other applications since 1989. Ultimate RB, now a Carlisle Company, is proud to introduce our newest generation of EPDM rubber granules: TRU-COLOR. Developed with the resources and expertise of Carlisle's 100+ years of rubber compounding TRU-COLOR brings to the market a high performance granule for every application.

Benefits:

- Consistent Color
- Superior Weathering
- Uniformly Clean Cut Granule
- Excellent Durability
- American Made
- Weather & Slip Resistant
- Color Options
- Eco-Friendly
- Custom Options
- Range of Sizes
- Quality Materials

Our process begins with formulation development and the procurement of quality raw materials. Then we proceed with mixing, curing, and granulating. This is a highly demanding and technical process that requires strict adherence to quality control standards at each step.

In addition to quality assurance, Ultimate RB provides value in several other ways. From a technical standpoint, we can modify our formulations to meet the varying physical properties that our customers require. From an aesthetic standpoint, we offer over 21 different colors. We can also develop custom colors to meet any need, and provide a wide range of granule sizes from small to large. Finally, from a logistics and cost standpoint, we offer many of the more popular colors at several strategic warehouse locations across the country.

With this combination of quality control, technical assistance, product variety, and logistical savings, Ultimate RB can provide optimal EPDM Granules for your application.
